

STIMULATING **PHYSICS** NETWORK

Supporting the Teaching and Learning of Physics

Summer School 2011

For non-specialist teachers of physics who have previously attended a Stimulating Physics Network summer school.

26–29 July, National Science Learning Centre, York

A programme of workshops, discussions, masterclasses, food and entertainment, provided at no cost. An award will be available to all who attend.

IOP Institute of Physics

As part of the Stimulating Physics Network, a “second year” summer school will be held in York for those teachers who have previously attended a Stimulating Physics Network summer school.

Aims

The summer schools have been planned to help you to:

- feel even more confident about teaching physics
- enjoy the subject more
- make physics more interesting for your students
- broaden your understanding of physics

“The workshops were truly inspirational, the speakers were brilliant, and the accommodation and food were exceptional.”

Who is it for?

The summer school is open to all teachers from the Stimulating Physics pilot schools who have previously attended one summer school in York or Oxford.

“An all-singing-and-dancing conference.”

Fees

There is no cost to you or your school; all costs will be covered by the Stimulating Physics Network. In recognition of the fact that this is not taking place during the school term, we will be offering an award of approximately £150 to all who attend.

For more information, or to apply, please contact Henry Lau (e-mail henry.lau@iop.org, tel 020 7470 4816) or visit www.stimulatingphysics.org/summerschools.

The programme

The programme will start with lunch on Tuesday 26 July and end after lunch on Friday 29 July.

The programme will include:

Workshops

Building on the first summer school:

- light, sound, waves, dynamics, momentum and energy
- talks from guest speakers
- and more...

“Thank you for an excellent four days. I have learned such a lot and cleared up many misconceptions.”

Food

All meals will be provided via a mixture of formal dining and outings.

Accommodation

The National Science Learning Centre has a purpose-built conference and accommodation block with modern en suite rooms. It is located on the University of York campus.

“An extremely well run and thought-out course.”

Entertainment

We will arrange games, after-dinner events and outings.
